## DETAILED ACTION

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- (i) Claims: 2-4, and 7 wherein specific products are selected based upon the product information, **the selected products composing a system.**
- (ii) Claim: 5, wherein specific products the product information, **the selected products comprising components**
- (iii) Claim: 6, wherein **the display is dynamically rendered to reflect added product options**
- (iv) Claims: 8-9, wherein the scheme system provides **configuration rules for configuring products based on the product information and the configuration rules provide for presenting only valid configurations of product options for the products.**
- (v) Claims: 8 and 10-11, wherein configuration rules are directed to provide budget based configuration analysis such **only the addition of product options that are within a predefined limit are presented and the budget is based upon at least one of: dimensions, weight, temperature, power consumption, air flow and cost.**
- (vi) Claims: 8 and 12, wherein configuration rules are directed to **presenting completed product bill of materials information prior to the bill of materials**

**information entering an order entry system.**

(vii) Claims : 8 and 13 are directed to **presenting only options that do not conflict with other options already selected for the product.**

(vii) Claim: 14 **comprising a reporting engine for tracking and recording activity of actual product selection criteria used during a user session.**

(viii) Claims: 15-16, further comprising a syndication and publication system providing for exporting of custom formatted product information and wherein the exporting is done periodically at predefined intervals.

(ix) Claim 17 wherein the display further comprises **an intelligent bill of materials displaying selected products and selected options for displaying products associated with a system, the display providing drill down for detailed information on the product.**

(x) Claim 18 is directed to **a system wherein the product information describes network infrastructure products.**

All the above indicated species require divergent search and are specifying a utility different from each other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, and 19-20 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yogesh C. Garg whose telephone number is 571-272-6756. The examiner can normally be reached on M-F(8:30-4:00).
